

# A Timely Delivery for DSCR-Richmond

**Project:**  
Boiler Backup Fueling

**Client:**  
DSCR-Richmond

The mission of Defense Supply Center-Richmond is to provide the best value aviation weapon systems and environmental logistics support for American Armed forces...on land sea and in the air. Recently Core Engineered Solutions received an urgent call from the DSCR. The Officers Club had a leaking fuel storage tank and needed to be replaced within 24 hours.

Core was able to supply the DSCR with a 1000 gallon aboveground tank for a boiler heating application within hours of the call. A dual wall UL 2085 rated ConVault storage tank was used to ensure the safest system possible. The system came complete with foundation, required signage and accessories. Core was able to arrange for immediate transportation to DSCR facility. The tank was delivered **less than four** business hours after receiving the initial phone call. Core Engineered Solutions carries stock tanks which are often available for immediate delivery.

To discuss your boiler backup or emergency power fueling applications with a Core specialist or to learn more about Core's capabilities, contact us at P: 800-628-5502, F: 703-563-0330 or E: [info@core-es.com](mailto:info@core-es.com)

The tank was delivered less than four business hours after receiving the initial phone call.
