

**Core Fueling Systems are Compatible with most Alternative Fuels including:**

**Ethanol  
(E10, E85, E95)**

**Methanol  
(M85)**

**Biodiesel  
(B20, B100)**

**Alternative Fueling Questions?**

**Let our knowledge be your greatest asset. Our systems are compatible with most alternative fuels**

Core Engineered Solutions has over 12 years experience with fuel storage systems. Our fuel storage experience includes alternative fuels storage and dispensing. We provide storage systems compatible with Methanol, Biodiesel and Ethanol. Our standard systems require little or no modification to accommodate most alternative fuels. Systems come complete with everything needed for operating...it's as easy as "plug and pump". Typical systems include: UL 2085 protected tanks, industry standard pumps, gauges, monitoring systems, spill/overfill basin, atmospheric/emergency vents, decals, fuel management systems, Stage II vapor recovery, site pad and more.

**Ethanol (E10, E85, E95) - Methanol (M85) - Biodiesel (B20, B100)**

Fleet Fueling Facility

**Ethanol (E10, E85, E95) - Methanol (M85) - Biodiesel (B20, B100)**
