

FUEL AND CHEMICAL STORAGE SPECIALISTS

Fuel Storage

- Vehicle Dispensing
- Emergency Power Fueling
- Marina Fueling
- Aviation Fueling
- Waste Oil
- Alternative Fuels
- Specialty Process Manufacturing

Chemical Storage

- Chemical Storage Buildings
- Household Hazardous Waste Buildings
- Emergency Shower, Eyewash and Drench Hose Systems

WITH YOU FROM CONCEPT-TO-COMPLETION

For more than 17 years, Core Engineered Solutions, Inc. has provided environmentally compliant fuel storage and chemical storage systems that meet the highest safety standards. Our system expertise includes vehicle dispensing systems, emergency power systems, aviation fueling, marina fueling, waste oil, alternative fueling and chemical storage systems. Our capabilities range from providing pre-engineered systems for standard applications to complex large-scale systems.

Core works with end users, engineers and project teams to provide systems design expertise and comprehensive support. Our experts are up to date on the latest environmental regulations and fire codes so you don't have to be. Our unique ability to provide a full scope of technical services and our thorough understanding of local and national regulations help ensure that your project is completed on time and within budget. Core's single source responsibility ensures system compatibility and timely completion of installation, as well as superior quality and operating performance.

Let us show you how our knowledge can be your greatest asset. Contact Core today!
